

Dear Sir/Madam,

Amsterdam 08/31/2025

[Subject: Open letter to the D66 party leadership regarding the glorification of SS symbols.](#)

Attachment: [Screenshot](#) Handing out fries in a destroyed city with a politician

I respectfully request your attention to the fact that on March 1, 2024, a politician from your party glorified SS symbols in the presence of French fry vendors from Brabant and has not distanced himself from this action to this day. As is clearly visible, Mr. Paternotte is standing behind SS symbols handing out French fries. The black and red Bandera flag is also visible.

The Banderists were responsible for the mass murders of Poles in Volhynia. Glorifying these SS symbols in a display case undermines the collective European memory on the basis of which we should have learned that everyone must be treated equally. After all, SS ideology leaves no room for pluralism, diversity, or multilingualism and is at odds with European values in general. In particular, it undermines the human rights of minorities and is therefore incompatible with the principles of the rule of law and democracy.

Since 2012, our foundation has been continuously committed to the European language rights of vulnerable historical autonomous minorities. All publications are listed chronologically at <https://language-rights.eu/NL/>

In 2016, the Foundation conducted an <https://stemtegen.eu> campaign on the Ukraine referendum in response to the report "Treason to Law" Online [https://language-rights.eu/TREASON\\_TO\\_LAW.pdf](https://language-rights.eu/TREASON_TO_LAW.pdf)

As a stakeholder, this harms my cause, as the SS ideology (*ethnic cleansing of vulnerable historical minorities*) is glorified by equating an unambiguous symbol of hatred with the humanitarian nature of food. This behavior, which I consider to be thuggish, is unworthy of a democratic party.

It is a disaster that Ukraine, with its exaggerated chauvinism, is simply reducing the vulnerable Hungarian minority in Transcarpathia to collateral damage in the conflict with Russia, and that there are fears for the survival of this minority, despite a letter to the [UN](#) calling on EU candidate member Ukraine to respect the [rights](#) of its minorities.

Yours sincerely,

Drs. G. Landman Chairman
